EVIDENCE SOURCES	FINDINGS	INCIDENTS	TIMELINE ENTRIES

01 EXECUTIVE SUMMARY

This report compiles persisted evidence and the latest saved analysis for this case. Findings, incidents, and timeline entries below are backend-authored; report approval and delivery are recorded separately.

02 DETERMINISTIC INCIDENT SUMMARIES

Credential attack and camera access

Fourteen failed administrator logins preceded a successful session. The same source then initiated camera control traffic within 74 seconds.

`INC-1001`

Session persistence

Follow-on access remained visible in the persisted session records until the device connection closed.

`INC-1002`

03 AI NARRATIVE (NON-AUTHORITATIVE)

The sequence is consistent with credential misuse followed by camera control traffic. This narrative is a non-authoritative annotation of the deterministic records below.

04 EVIDENCE REGISTER

entryway-authentication.log

Source type: device log | Accepted records: 1,843 | Rejected records: 1

`ID EVD-0001 / SHA-256 1111111111111111111111111111111111111111111111111111111111111111`

camera-rtsp-session.log

Source type: device log | Accepted records: 1,844 | Rejected records: 0

`ID EVD-0002 / SHA-256 2222222222222222222222222222222222222222222222222222222222222222`

gateway-netflow.csv

Source type: device log | Accepted records: 1,845 | Rejected records: 1

`ID EVD-0003 / SHA-256 3333333333333333333333333333333333333333333333333333333333333333`

05 FINDINGS

Repeated administrator failures

Authentication telemetry records repeated failures from a single source.

`FND-0001`

Successful camera session

The source subsequently obtained an administrator session.

`FND-0002`

RTSP control sequence

Control commands were observed after the successful session.

`FND-0003`

Source correlation

Gateway and device records share the same source address and time window.

`FND-0004`

06 INCIDENTS

Credential attack and camera access

Fourteen failed administrator logins preceded a successful session. The same source then initiated camera control traffic within 74 seconds.

`INC-1001`

Session persistence

Follow-on access remained visible in the persisted session records until the device connection closed.

`INC-1002`

07 FORENSIC TIMELINE

First login failure

Persisted event at 2026-09-29T09:01:00Z.

`TL-0001`

Failure sequence continues

Persisted event at 2026-09-29T09:02:00Z.

`TL-0002`

Administrator login succeeds

Persisted event at 2026-09-29T09:03:00Z.

`TL-0003`

RTSP session begins

Persisted event at 2026-09-29T09:04:00Z.

`TL-0004`

Camera control command

Persisted event at 2026-09-29T09:05:00Z.

`TL-0005`

Session ends

Persisted event at 2026-09-29T09:06:00Z.

`TL-0006`
